

If you want to create a new branch to retain commits you create, you may do so (now or later) by using `-c` with the switch command. Example:

```
git switch -c <new-branch-name>
```

- ❷ Or undo this operation with:

```
git switch -
```

Turn off this advice by setting config variable `advice.detachedHead` to false

```
HEAD is now at cea13d Started project.
git_practice$
```

---

When you check out a previous commit, you leave the main branch and enter what Git refers to as a *detached HEAD* state ❶. *HEAD* is the current committed state of the project; you're *detached* because you've left a named branch (main, in this case).

To get back to the main branch, you follow the suggestion ❷ to undo the previous operation:

```
git_practice$ git switch -
Previous HEAD position was cea13d Started project.
Switched to branch 'main'
git_practice$
```

---

This command brings you back to the main branch. Unless you want to work with some more advanced features of Git, it's best not to make any changes to your project when you've checked out a previous commit. However, if you're the only one working on a project and you want to discard all of the more recent commits and go back to a previous state, you can reset the project to a previous commit. Working from the main branch, enter the following:

- ```
❶ git_practice$ git status
On branch main
nothing to commit, working directory clean
❷ git_practice$ git log --pretty=oneline
945fa13af128a266d0114eebb7a3276f7d58ecd2 (HEAD -> main) Extended greeting.
cea13ddc51b885d05a410201a54faf20e0d2e246 Started project.
❸ git_practice$ git reset --hard cea13d
HEAD is now at cea13dd Started project.
❹ git_practice$ git status
On branch main
nothing to commit, working directory clean
❺ git_practice$ git log --pretty=oneline
cea13ddc51b885d05a410201a54faf20e0d2e246 (HEAD -> main) Started project.
git_practice$
```
- 

We first check the status to make sure we're on the main branch ❶. When we look at the log, we see both commits ❷. We then issue the `git reset --hard` command with the first six characters of the reference ID of
