

Salazar, a reversal theme

By C.G.S.Narayanan

The concept of try play in the modern two-mover opened up new vistas for many reversal themes involving different combinations of the four basic components-the threat, mate, defence and refutation. While the popular themes like Dombrovskis and Hannelius are capable of being shown only in three phases i.e in two tries and key, le Grand and Salazar can be presented in two phases and of the two, le Grand is decidedly more popular.

In Salazar the try and the key are interchanged as mates after a particular black defence in either of the phases e.g Try 1.A? a 2.B and key 1.B! a 2.A.The problem for study this week is a rare example which doubles the Salazar theme in fine style incidentally completing a three phase zagoruyko.

Vasyl Dyachuk

3 prize, wola Golowska 1999

Mate in two moves

The two prominent defences are 1...Qd5 and 1...Rxf7 which are met by white in three phases. The first try 1.Nge5 (A)? threatens 2.Nd8 and after 1...Qd5 2.Bh3 (B) and also mate 2.Qxf7 provided for 1...Rxf7 and this try fails to 1...Qa8!.The second try 1.Ngf6? (C) threatens the same Nd8 and after 1...Rxf7 2.Bh3(B) and the other defence

1...Qd5 is also provided with a new mate 2.Bxd5 but the try fails to 1...Kxf7! The **key 1.Bh3(B)** forces a unique threat 2.Ne3 and after 1...Qd5/Rxf7 the tries reappear as mates 2.Nge5 (A)/Ngf6 (C).A highly original Salazar in three phases. The second problem below shows Salazar reversal between the second try Qxh7? and solution.

P.Murashev

1 prize, Pat a mat 2018

Mate in two moves

1.Rxd6? A (Qxh7 B)1...Nd4 2.Nc3 Bxd5!; 1.Qxh7? Bxd5 2.Re6 Nd4!; **Key:1.Re6!**(2.Nc3)1...Bxd5 2.Qxh7; 1..Kxd5 2.Rxe5(2.Qb7?)

Finally a Salazar by the inventor himself for solving.

F.Salazar

2 prize, Die Schwalbe 1968

Mate in two moves

Solution to problem for solving in the article 'Strategic three-movers':

Key:1.Bc6!(2.Re3+ dxe3 3.d4)
Quaternary correction by BNf4.1...N any 2.Rxe7 3.Rxe6.; 1...Ng6 2.c3 3.cxd4 1...Ne6 2.Kxb2 3.Nc4; 1...Nd5 2.Nb5 3.Bxd4
