

## Tries and white correction

By C.G.S.Narayanan

It is better to define try as a method of attack which draws the solver attention and obscures the real solution. In such a case the try must make an impression as good as the true solution. It is for this reason tries in white correction problems often arise by having the key piece somewhat obvious with deception centering around its disposition. The first problem below for study is an ideal white correction problem with logical tries.

I prize, ICPS-India Cements 95-96

Mate in two moves

Ace British composer Barry.P.Barnes commented-"Four prominent set mates are changed by a fine key granting a flight a flight square f5.Logic drives WNe4 to f6 after the random move error of not providing for 1...exf5 which defeats the threatened 2.Qe4.The WN tries and key provide a fourth mate (one in the set play)after 1...exf5! with correction errors in part negation of set mates.This is class white (secondary) white correction problem which should be widely quoted.

Set:1...exf5/exd5/Bf4/Bc2

2.Bf6/Re6/Qf6/Qxh2 1.Nany?(2.Qe4) 1...exf5! 1.Nef6? exf5 2.Nf7 but 1..Bf4!(2.Qf6?) 1.Ng3? (2.Qe4) exf5 2.Rxf5 but 1...Bc2!(2.Qxh2?)

**Key 1.Nhe6!** 1...exf5/exd5/Bf4/Bc2 2.Re6/Rxd5/Ng4/Md7.

In the second problem the key piece can be easily spotted as WNd3 and the logic behind the tries cannot be missed. The set mates after 1...fxe4 and Nxb5 are 2.Qxg5 and Bf4.Buit the pin of WQ by 1..f4 prevents the threat 2.Qd3.So WN starts avoiding this lethal pin.1.Nc5? fails to 1..fxe4 preventing 2.Qxg5.Try 1.Ne5? provides for 1..fxe4 with 2.Ng2 but fails to 1...Nxb5!(2.Bf4?) **Key 1.Nf4!** continues with errors of closing WB and WQ lines but provides new mates 2.Nfg2 and 2.Nd5.A highly original white correction try sequence.

Mate in two moves

Problem for solving below is white correction with reduced mates

C.G.S.Narayanan  
The Hindu,Nov 1996

Mate in two moves

Solution to problem for solving in the article 'The queen correction':

1.N any? Nf6! 1.Nc3?Bxc4!(2.Re3?) 1.Nf4? gxf5!(2.Qe3?)**Key 1.Ne3!!**
