HOME VENUE

Sawai Mansingh Stadium,
Jaipur/Barsapara Cricket Stadium,
Guwahati

LAST SEASON

Third

PowerPlay economy rate

8.08

Rajasthan Royals' economy rate in the PowerPlay since 2023 - the lowest for any team. Additionally, the team's bowling average during this phase (30.58) is the second-best over the last two seasons. However, the team achieved this largely due to the exploits of left-arm pacer Trent Boult, who was not retained by the franchise for the upcoming season. RR will hope Jofra Archer, who has an economy rate of 5.74 in the PowerPlay in the IPL, can step into the breach and fill this void.

Highest strike rate against seamers

159.16

The combined strike rate against pace (IPL 2024) of Yashasvi Jaiswal, Sanju Samson, and Riyan Parag, who could form Rajasthan Royals' potential top three this year. RR has traditionally relied on its top order to deliver with the bat, and the onus will be on the trio to continue providing the team with strong starts in the absence of Jos Buttler. All three feature in the top 10 list of batters with the highest strike rate against seamers last year (minimum 300 runs), with Riyan leading his team-mates with a scoring rate of 163.47 per 100 balls faced.
