Trump card misfires

8.40

Rashid Khan's economy rate in 2024 - his worst for any season in the IPL. This was only the second time, after 2023, that Rashid conceded more than eight runs an over in a single edition of the IPL since his debut in 2017. His 10 wickets from 12 matches was also his lowest wickets tally for a single season in the IPL. The Afghan spinner's slump in form contributed majorly to GT's poor 2024 campaign, as the side picked up the least number of wickets (27) in the middle overs and had the second worst bowling average (37.48) during this phase.
