

Struggles at the back end

11.06

11.06 - Punjab Kings has struggled at the death (overs 16-20) in the last two seasons, conceding at 11.06 runs per over — only three teams have fared worse in this period. At the 2025 mega auction, Punjab Kings released Kagiso Rabada and Harshal Patel, entrusting Arshdeep Singh with leading the pace attack. While Arshdeep's career economy rate at the death in the IPL stands at 9.62, it has surged to nearly 11 over the past two seasons (among bowlers who have bowled at least 50 deliveries in this phase). To make matters worse, the 26-year-old is set to receive minimal support. Marco Jansen has bowled just 12 deliveries at the death in the IPL, conceding at a costly 16 runs per over for Sunrisers Hyderabad. Other pace options — Kuldeep Sen, Lockie Ferguson, Azmatullah Omarzai, Vyshak V., and Marcus Stoinis — have all leaked over 12 runs per over in this phase. Punjab Kings will need to find solutions quickly to avoid repeating past struggles at the back end of innings.

BEST FINISH - RUNNER-UP
