

RUNNING INTO 2025 AND INFINITY.

Running. Something about it just seems right. The wind in our face, the ache in our legs, and the inner voice urging us onward – all these elements contribute to its ethereal allure. For many, running is a way of life, while for countless others, each new year brings a renewed resolution to embrace it.

WHY IS RUNNING SO CAPTIVATING? There's no single answer, but it has always been associated with maintaining fitness, especially given that is remarkably accessible to everyone. Most people can run, the only difference is the pace at which one runs. You don't require a gym membership or a fancy equipment at home. All you need are a pair of shoes, a road and a desire.

Running offers numerous fitness and mental benefits, but it can also place significant stress on joints and muscles, potentially leading to a variety of injuries.

Common running injuries include Runner's knee, IT Band Syndrome, Shin Splints, Plantar Fasciitis, Hamstring strains, Hip flexor strains, Achilles Tendinitis etc

Major causes of these injuries include improper technique, inadequate footwear, overuse and overtraining without adequate rest, insufficient warm-up and cool-down, and ignoring pain.

How to optimize your running technique? We have shared some tips for you to run till infinity.
