

PERIODISATION

A planned training approach that involves varying the volume and intensity (**difficulty and amount of training**) to achieve peak performance. It involves division of a training year (macrocycles) into smaller and more manageable intervals (mesocycles). Each phase targets a specific or series of attributes to be developed within a designated period of time. It aims to achieve an appropriate balance of training loads and competitive readiness, manage fatigue and reduce overtraining potential, and ensure proper staging and timing of the peak.

PERIODISATION HELPS IN:

- OPTIMISING PERFORMANCE TO PEAK AT THE RIGHT TIME
- TO PREVENTING OVERTRAINING INJURIES

TYPES OF PERIODISATION

LINEAR	UNDULATING/ NON LINEAR	BLOCK
GRADUAL INCREASE IN TRAINING INTENSITY AND DECREASE IN VOLUME OVER TIME.	DAILY FLUCTUATIONS IN TRAINING VOLUME AND INTENSITY.	TRAINING DIVIDED INTO SPECIFIC BLOCKS, EACH WITH A PRIMARY FOCUS.
WEIGHTLIFTING	FOOTBALL	ENDURANCE SPORTS

PERIODISATION IN SIMPLE WORDS

OFF-SEASON	PRE-SEASON	IN-SEASON	POST-SEASON
BUILDING FOUNDATIONAL PHYSICAL CAPACITIES, GENERAL FITNESS AND ACTIVE RECOVERY EMPHASIZE STRENGTH, ENDURANCE AND FLEXIBILITY	SPORT SPECIFIC FITNESS AND CONDITIONING, SKILL DEVELOPMENT EMPHASIZE SPORTS DRILLS SPEED AND AGILITY TRAINING	PEAK PERFORMANCE, COMPETITION AND OVERALL TRAINING EMPHASIZE MAINTENANCE AND TACTICAL TRAINING	GRADUAL REDUCTION IN TRAINING VOLUME AND INTENSITY EMPHASIZE ACTIVE RECOVERY INJURY MANAGEMENT AND REHABILITATION FLEXIBILITY & MOBILITY TRAINING

Halt Sports Injuries (HSI) : An Ortho One Initiative which helps the athletes from injuries by creating awareness through learning session and medical support at subsidised amount for deserving sports person.

(Note: Donation are exempt under 80(G) and CSR Income Tax act)
