

Play by the white queen

By C.G.S.Narayanan

When black obstructs a potential black defence white exploits the weakness on the second move in Dresden theme. The strategic three-mover by the Russian master extends the idea to three pieces with very fine dual avoiding mechanism for the black defences at c3. The second move continuations are good tries but defeated by the three prominent defences at c3. 1...exf3? Nc3!; 1...Bb6? Bc3! 1.Bxb5? Rc3! The **key 1.Ng7** plans 2.Nf5 followed by 3.Ne7

Mate in three moves

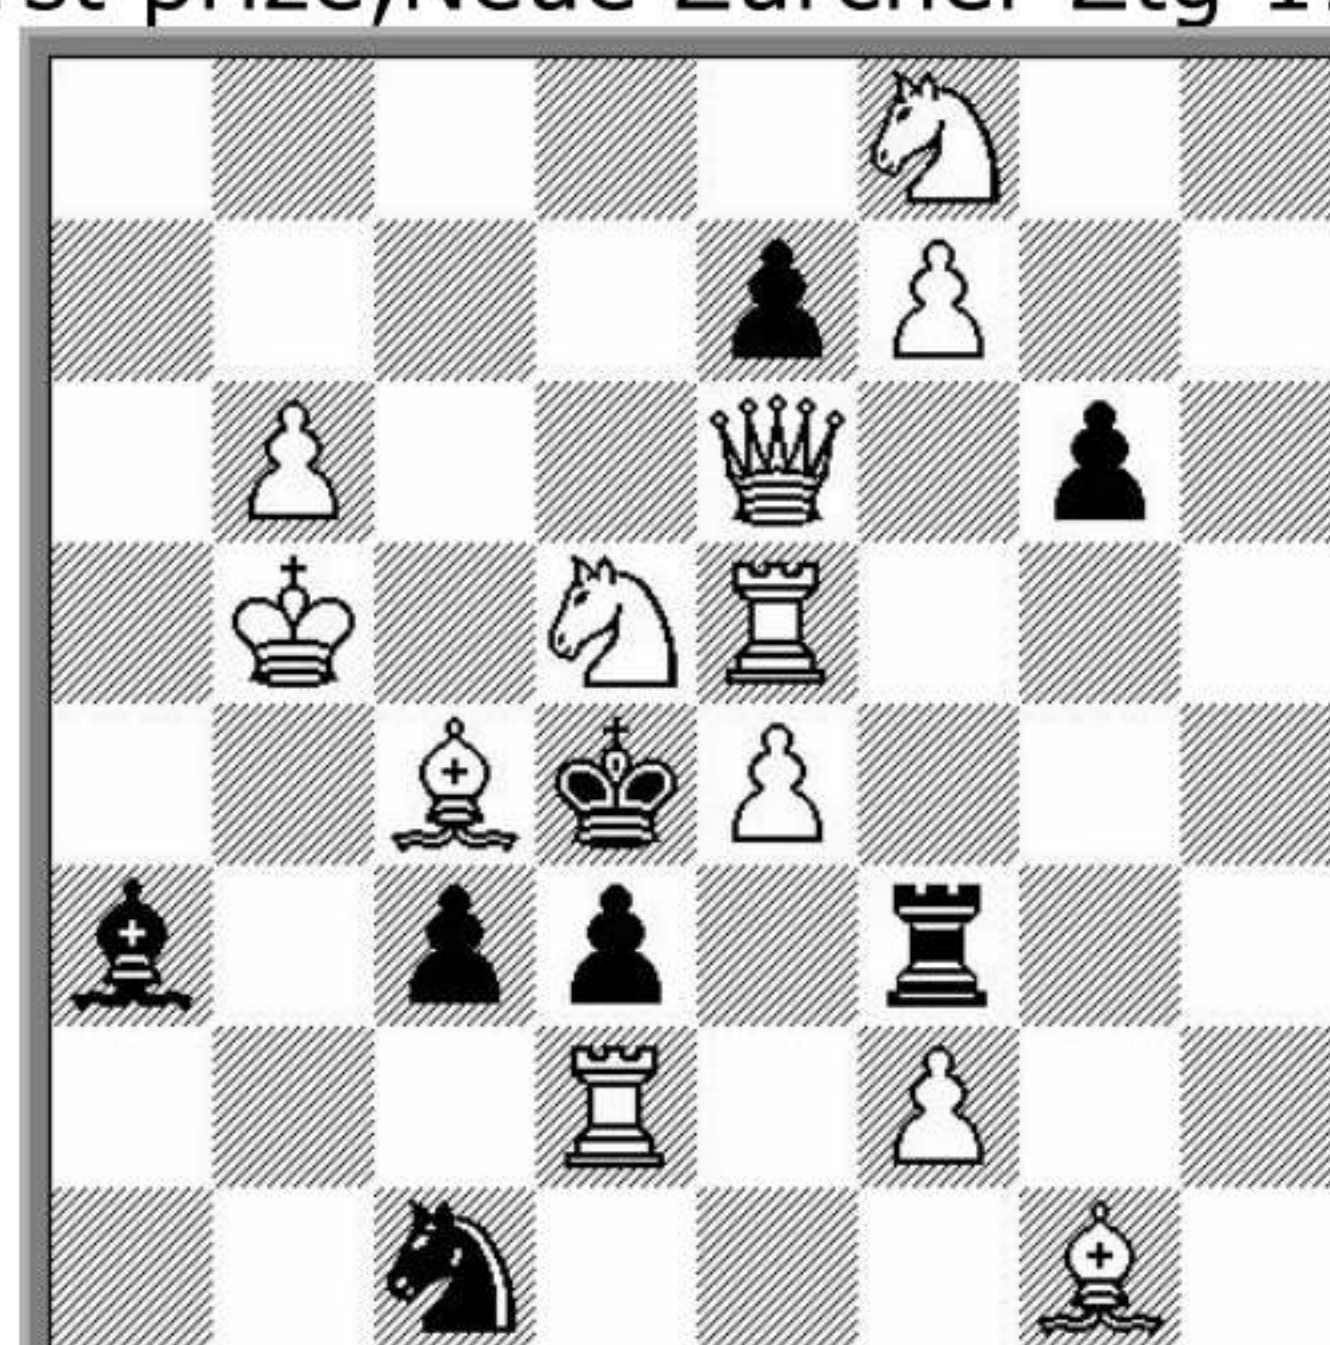

The defence motif is to cut off white queen's guard by both 1...Nc3 and 1...Bc3. After 1...Nc3 both 2.Bb6 and Bxb5 appear to be playable but only Bb6 works with Ne4 3.Qe6 mate. 1..Bc3 subtly eliminates 2.Bb6 for 1..Kxe5! and so 2.Bxb5 Bd4 3.Qxf3 yet another self-block. 1...Rc3 thwarts 2.Nf5 with 2...Rxc7 but the continuation is 2.exf3 Rc4 3.Qd7. The three quiet moves followed by three different self blocks ending in attractive queen mates make this Dresden most appealing and the cyclic obstruction is made to look incidental by the composer's virtuosity.

The second problem presents white queen in a non-checking quiet mode in the three variations. After the **key**

1.Bh2! the white queen threatens to vacate with 2.Qf5 for 3.Ne6 shutting off BR route to f6. The apparently far away BNC1 provides entertaining play to counter the threat.

Mate in three moves

After moves BNC1 BR is tied down to guard d3 WQ moves quietly sets up appropriate battery to provide mates for interferences by the BN with BB and BR. 1...Nb3 2.Qd6 Nc5 3.Nxe7. Similarly 1...Ne2 2.Qf6 Nf4 3.Ne6

In the problem for solving (below) the clue is how to open up the R+P battery. The quiet moves of WQ follow the three captures on d5.

Mate in three moves

Solution to problem for solving in the article 'Correcting the correction':

Try: 1.eN any? (2.Bg6) 1..Rg5 2.Qf7; 1..Be4 2.Be6; 1...Ng3 2.Qd1 but 1...Bxf6! Try 1.Nf3? 1...Ng3 2.cNxe3 ; 1...Rg3 2.cNb4; but 1...Bh3!

Key 1.Ng4!! (2Bg6) 1...Bxf6 2.Nxf6; 1...Ng3 2.gNxe3
