UNLOCK YOUR MAX POTENTIAL FOR IMPROVED PERFORMANCE

Harnessing EMS Training for Enhanced Muscle Activation!

EMS - A powerful tool in the pursuit of peak performance

Posture, core stability and overall functional movement can be improved by strengthening the underactive muscles. EMS (Electrical Muscle Stimulation) training is a powerful tool for enhancing workouts and promoting overall muscle health. It targets specific muscle groups more effectively than traditional weight training, making it a great option for addressing muscle imbalances or weaknesses. EMS training can be adapted for various fitness levels and goals, from beginners to advanced athletes, making it a versatile addition to any workout routine.

Halt Sports Injuries (HSI) : An Ortho One Initiative which helps the athletes from injuries by creating awareness through learning session and medical support at subsidised amount for deserving sports person.
