

Chapter 9: Drawing Fractals Tours the intriguing art that can be programmatically produced by recursive algorithms. This chapter makes use of turtle graphics for generating its images.

Part II: Projects

Chapter 10: File Finder Covers a project that searches through the files on your computer according to custom search parameters you provide.

Chapter 11: Maze Generator Covers a project that automatically generates mazes of any size using the recursive backtracker algorithm.

Chapter 12: Sliding-Tile Solver Covers a project that solves sliding-tile puzzles, also called 15-puzzles.

Chapter 13: Fractal Art Maker Explores a project that can produce custom fractal art of your own design.

Chapter 14: Droste Maker Explores a project that produces recursive, picture-in-picture images using the Pillow image-manipulation module.
