SWINGING FOR THE FENCES: INDIA'S SIX-HITTING SURGE AND THE RISKS THAT COME WITH IT

A look at how India's Test batting has **evolved** from running-intensive innings to a boundary-heavy, six-hitting approach — and what the shift says about modern strategy.

The first three Tests have been intense battles, with England and India pushing each other all the way. A few mini-sessions of play have been the difference between a buoyant win and an ignominious

close loss.

England took a 2-1 series lead after India faltered in the final innings at Lord's while attempting a 193-run chase. The pressure of constant wickets ensured that the Indian batting order was never allowed to

bat at its natural pace — reflected in the fact that there was only one six in the entire chase.

Since the start of 2022, India has scored 9.91 per cent of its Test runs through sixes — at least 2.01 per cent more than any other Test-playing
