

Battery destruction

By C.G.S.Narayanan

Battery by white is a two-piece formation in which a rear piece, which is invariably a line piece and a frontal piece which can be any except the white queen, fire at the black king through discovered checks. White batteries can be created, abandoned or even destroyed to show creative ideas in chess compositions. In this article three-movers with battery destruction are presented. There are two ways of destroying a battery- one by black and the other by white.

I Agapov & Z.Janevski
Zadach I Etyudy 2012

Mate in three moves

After the battery forming **key 1.Qd6!** there are three black self-pins on e6 meeting the set battery threat 2.e7+ Re6/Ne6.Be6 3.e8N mate. These three black moves reappear as battery destruction defences in three variations. The problem also shows Umnov I theme where white's second moves are to the squares vacated by black pieces.

1...Rxe6 2.e4 any 3.e5(2...dxe3 e.p 3.Bc3; **1...Nxe6** 2.f4 (3.fxg5) Rxf4/gxf4 3.Qe5/Bh4; **1...Bxe6** 2.g4 (3.Ne8) B any 3.Qe7; 1...fxe6 2.Qf8+ Nf7+ 3.Qxf7.

In the second problem below white forms the Q+P battery with the key

1.Rd6! threatens 2.e6+ Ne5 3.Qxe5. Now for the first two defences on f4 white destroys his own battery to create new ones and after the third defence white abandons his battery.

1-2 Hon.Men, 1st TT FRME Ty 2019

Mate in three moves

The variations are **1...Rxf4** 2.Nf6 (3.Rxd5) Kxe5+ 3.fNe4; **1...Nxf4** 2.Ng7 (2.Nxf5) Kxe5 3.Ne8; **1...gxf4** 2.Qa8 any 3.Q/Rxd5.

The problem for solving has doubled battery formation and destruction by capture of the front pieces.

M.Dragoun

2 Prize, Sachova skladba 2012

Mate in three moves

Solution to problem for solving in the article 'Unique Umnov': **Key 1.Qe2!** (threat 2.Qa2 Rf5 3.Qxf5) 1...Rf5 2.e5 3.any 3.Ne5) 1...Rg5 2.Ne5 Kxf6 3.Rxf7 1...Rxc5 2.Be5 Rxe5 3.Rxc6. Single BR induces three-fold Umnov.
