

For young athletes who show exceptional promise, the state is setting up residential training centres based on the **Eklavya model**. These centres identify talented boys and girls from government schools and provide them with a complete support system.

In parallel, the government is developing multi-purpose sports buildings and gymnasiums in each district. These facilities serve a dual

purpose — they provide athletes with training and fitness resources, and also act as community hubs where citizens can engage in health and wellness activities. So far, 25 districts have completed these sports-cum-fitness centres, and another 13 have received official approval for construction. This wave of infrastructure development reflects an important shift in policy thinking — from reactive support to proactive investment.

Financial Incentives for Performance: The Sports Scholarship Program

Beyond physical infrastructure, the state is making strategic financial interventions to support its athletes. The Sports Scholarship Scheme, launched under the Chief Minister's plan, provides monetary support to deserving athletes so they can train and compete without financial stress. In the fiscal year 2024–25 alone, a total of ₹7.15 crore has been allocated, directly benefiting 128 talented athletes across the state.

For many young sportspersons, this scholarship serves not only as a financial lifeline but also as a validation of their efforts and potential. It reassures them that their state believes in their journey and is committed to helping them succeed.

The World's Largest Sports Talent Hunt: MASHAAL 2024

One of the most ambitious undertakings within the Chief Minister's Sports Development Scheme is 'Mashaal 2024', touted as the largest sports talent search campaign in the world. This initiative
