

four opening group games.

A longer tournament with a round-robin format allows teams to play a far more aggressive brand of cricket, as the law of averages will eventually come to their rescue.

But in a shorter tournament, that wouldn't necessarily be the case, as one misstep could potentially spell doom for a team.

Consistent conditions

In the IPL, batters are up against consistently familiar conditions since the tournament is almost always hosted in India.

This familiarity with grounds, weather conditions, and even bowling attacks provides batters with regularity, which in turn helps in easier run scoring.

But, with the T20 World Cup being hosted in turns by different countries, batters are often forced to adapt to varying conditions within a short period, resulting in reduced risk-taking and lower strike rates.

Home advantage

IPL also provides teams and batters with the advantage of a

Adaptability is the key: With the T20 World Cup being hosted in turns by different countries, batters like Nicholas Pooran are often forced to adapt to varying conditions within a short period, resulting in reduced risk-taking and lower strike rates. GETTYIMAGES
