

- scoring games, [189–190](#)
- algebra, [5](#)
- algorithmic approach
 - Chapman’s algorithm, [9–10](#)
 - thinking with your neck, [6–9](#)
- algorithms, [13](#)
 - adding theoretical precision, [63–64](#)
 - alpha–beta pruning, [199](#)
 - avoiding use of, [48–49](#)
 - Babylonian, [90](#)
 - Bowyer-Watson, [136](#)
 - comparing to functions, [60–63](#)
 - counting steps, [57–60](#)
 - divide and conquer, [69](#)
 - doing more with, [202–203](#)
 - finding maximum, [42](#)
 - gaining expertise, [209](#)
 - measuring efficiency, [55–57](#)
 - measuring time, [57](#)
 - merging sorted lists, [67](#)
 - minimax, [195–198](#)
 - performing “by hand,” [14–18](#), [20–21](#)
 - perturb search, [112](#)
 - refraining from using, [48–49](#)
 - solving problems with, [10–11](#)
 - tax rates, [39](#)
