

Chapman, Seville, [6](#)

Chapman's algorithm, [9–11](#). *See also* the outfielder problem

chatbot, building, [203–208](#)

chess, solving eight queens puzzle, [209–212](#)

Chesterton, G. K., [151](#)

circles, drawing, [133](#)

circumcenters

- finding for triangles, [131–133](#)

- plotting, [145](#)

- relationship to triangles, [134](#)

circumcircles

- plotting, [145](#)

- relationship to triangles, [132](#), [134](#)

combinatorial explosion, using in TSP (traveling salesman problem), [108](#)

compound words, dealing with, [152–153](#). *See also* words

constructive methods of Euclid, [20](#)

continued fractions. *See also* fractions to radicals

- algorithm for generating, [82–85](#)

- compressing and communicating Phi, [79–80](#)

- versus decimals, [86–88](#)

- overview, [78](#), [80–82](#)

- to radicals, [88](#)

continued square roots, [88](#)

corpus, [149](#), [160](#). *See also* imported corpus

cosine similarity, [206–208](#)

Counter() function, using with n + 1-gram, [161](#)
