

- generating, [136–139](#)
- implementing, [139–143](#)
- overview, [134–136](#)
- purpose of, [136](#)
- returning from points, [142](#)
- to Voronoi, [143–147](#)

E

- education and lifetime income, [42–45](#)
- Elements*, [20](#)
- equilateral, geometric terminology, [130](#)
- ESS (European Social Survey), using with decision trees, [168](#)
- Euclid’s algorithm, [20–22](#), [84–85](#)
- exclusive OR operation, [98](#)
- exponential function, [60–61](#)

F

- False, Kurushima’s algorithm, [27](#)
- feedback shift register, [98](#)
- file-sorting method, [52–54](#). *See also* sorted filing cabinets
- `fillsquare()` function, Kurushima’s algorithm, [31–32](#)
- finding words, [151–152](#)
- `finder()` function, using with words, [152](#)
- `findnearest()` function, using in TSP (traveling salesman problem), [109](#)
- `float('nan')` function, using with Kurushima’s algorithm, [24](#)
- `floor()` function, using for binary search, [73–74](#)
- for loop, using with words and spaces, [157](#)
