

maximization and minimization, [45–48](#)

maximum

- and asymptote approach, [39–40](#)

- education and lifetime income, [44–45](#)

- and minimum of step values, [60–61](#)

- revenue, [39](#)

- solving first-order conditions, [42](#)

- taxation/revenue curve, [41–42](#)

maxitin argument, adding, [122](#)

merging to sorting, [65](#), [68–70](#). *See also* sorting

Mersenne Twister PRNG, [99](#)

metaheuristics, metaphor based, [117–118](#)

Mikami, Yoshio, [22](#)

Millennium Prize Problems, [212](#)

minimax algorithm

- using to make decisions, [199](#)

- using to win games, [195–198](#)

minimax() function, calling, [198](#)

modulo (%) operator

- Euclid’s algorithm, [21](#)

- Kurushima’s algorithm, [27–28](#)

- RPM (Russian peasant multiplication), [19](#)

- rules, [32](#)

Monte Carlo methods, [199](#)

mystery number and continued fraction, [81](#)
