

S

science, laws of, [130–131](#)

scoring games, [189–190](#)

search suggestions, strategy for generating, [160](#), [162–163](#)

searching versus sorting, [72–75](#)

Shakespeare's works, accessing, [160–161](#), [163](#)

`siman()` function, using for simulated annealing, [122–123](#)

Simmons, Joseph, [179](#)

simulated annealing, [115–124](#). *See also* optimization; perturb search; TSP (traveling salesman problem)

sleep sort, [70–72](#). *See also* sorting

Smith, David Eugene, [22](#)

solve-for-x strategy, [4–5](#), [10–11](#)

sorted filing cabinets, merging, [62](#), [64–65](#). *See also* file-sorting method

sorting. *See also* merging to sorting; sleep sort

 lists, [153](#)

 via insertion, [54–55](#)

 to searching, [72–75](#)

space insertion

 checking for potential words, [153–154](#)

 checking for valid words, [154–156](#)

 dealing with compound words, [152–153](#)

 defining word lists, [151–152](#)

 finding halves of potential words, [156–158](#)

 finding words, [151–152](#)

 overview, [150–151](#)
