

True, Kurushima's algorithm, [27](#)

TSP (traveling salesman problem). *See also* optimization; simulated annealing

greedy algorithms, [112–113](#)

improving, [110–112](#)

nearest neighbor algorithm, [108–110](#)

overview, [102–103](#)

versus postmaster problem, [127](#)

setting up, [103–108](#)

temperature function, [113–115](#)

tuples, using with words and spaces, [152](#)

U

underfitting decision trees, [181–182](#)

up_right, Kurushima's algorithm, [28–29](#)

upper bound, defining for binary search, [73](#)

V

vector similarity, determining, [206–208](#)

vertex, geometric terminology, [130](#)

Voronoi diagram

generating, [143–147](#)

for postmaster problem, [128](#)

W

while loop, Kurushima's algorithm, [31](#)

while loop

using for binary search, [74](#)
