

rectangle like this in an upcoming example program. Even if your image is not rectangular (for example, if it's a circle or an ellipse), you still have to consider its bounding rectangle for positioning and collision detection.

Figure 5-4: An image in a window

Pixel Colors

Let's explore how colors are represented on the computer screen. If you have experience with a graphics program like Photoshop, you probably already know how this works, but you may want a quick refresher anyway.
