

Table 5-1: *Direct Access to Attributes of a rect*

Attribute	Description
<code><rect>.x</code>	The x-coordinate of the left edge of the <code>rect</code>
<code><rect>.y</code>	The y-coordinate of the top edge of the <code>rect</code>
<code><rect>.left</code>	The x-coordinate of the left edge of the <code>rect</code> (same as <code><rect>.x</code>)
<code><rect>.top</code>	The y-coordinate of the top edge of the <code>rect</code> (same as <code><rect>.y</code>)
<code><rect>.right</code>	The x-coordinate of the right edge of the <code>rect</code>
<code><rect>.bottom</code>	The y-coordinate of the bottom edge of the <code>rect</code>
<code><rect>.topleft</code>	A two-integer tuple: the coordinates of the upper-left corner of the <code>rect</code>
<code><rect>.bottomleft</code>	A two-integer tuple: the coordinates of the lower-left corner of the <code>rect</code>
<code><rect>.topright</code>	A two-integer tuple: the coordinates of the upper-right corner of the <code>rect</code>
<code><rect>.bottomright</code>	A two-integer tuple: the coordinates of the lower-right corner of the <code>rect</code>
<code><rect>.midtop</code>	A two-integer tuple: the coordinates of the midpoint of the top edge of the <code>rect</code>
<code><rect>.midleft</code>	A two-integer tuple: the coordinates of the midpoint of the left edge of the <code>rect</code>
<code><rect>.midbottom</code>	A two-integer tuple: the coordinates of the midpoint of the bottom edge of the <code>rect</code>
<code><rect>.midright</code>	A two-integer tuple: the coordinates of the midpoint of the right edge of the <code>rect</code>
<code><rect>.center</code>	A two-integer tuple: the coordinates at the center of the <code>rect</code>
<code><rect>.centerx</code>	The x-coordinate of the center of the width of the <code>rect</code>
<code><rect>.centery</code>	The y-coordinate of the center of the height of the <code>rect</code>
<code><rect>.size</code>	A two-integer tuple: the (width, height) of the <code>rect</code>
<code><rect>.width</code>	The width of the <code>rect</code>
<code><rect>.height</code>	The height of the <code>rect</code>
<code><rect>.w</code>	The width of the <code>rect</code> (same as <code><rect>.width</code>)
<code><rect>.h</code>	The height of the <code>rect</code> (same as <code><rect>.height</code>)

A `pygame.rect` also can be thought of, and accessed as, a list of four elements. Specifically, you can use an index to get or set any individual part of a `rect`. For instance, using the `ballRect`, the individual elements can be accessed as:
