

```
# 12 - Slow things down a bit
clock.tick(FRAMES_PER_SECOND) # make pygame wait
```

Listing 5-8: A program to demonstrate calls to primitive drawing functions in pygame

The drawing of all the primitives occurs in section #10 ❶. We make calls to pygame's drawing functions to draw a box with two diagonals, filled and empty circles, filled and empty rectangles, filled and empty ovals, a six-sided polygon, an arc, and two anti-aliased lines.
