

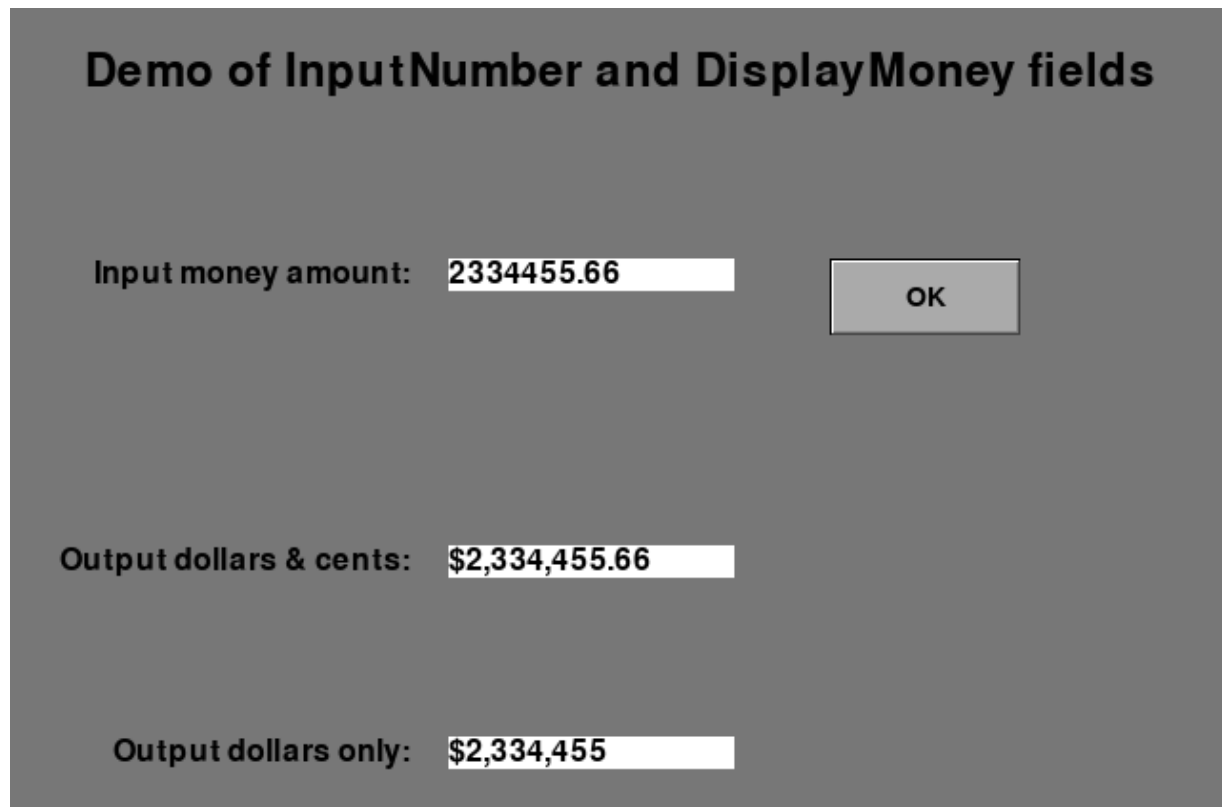

Figure 10-5: A client program where the user enters an amount into an `InputNumber` field and the amount is displayed in two `DisplayMoney` fields

File: MoneyExamples/Main_MoneyExample.py

```
# Money example
#
# Demonstrates overriding inherited DisplayText and InputText methods

# 1 - Import packages
import pygame
from pygame.locals import *
import sys
import pygwidgets
from DisplayMoney import *
from InputNumber import *

# 2 - Define constants
BLACK = (0, 0, 0)
BLACKISH = (10, 10, 10)
GRAY = (128, 128, 128)
WHITE = (255, 255, 255)
```
