

```
        backgroundColor=DIALOG_BACKGROUND_COLOR,  
        promptTextColor=DIALOG_BLACK,  
        inputTextColor=DIALOG_BLACK)
```

```
userAnswer = pyghelpers.textAnswerDialog(window, (75, 100, 500, 200),
                                           'What is your favorite flavor of ice cream?')
if userAnswer is not None:
    # User pressed OK, do whatever you want with the variable userAnswer
else:
    # Here do whatever you want knowing that the user pressed Cancel
```

What is your favorite flavor of ice cream?

Cancel OK

implement a custom Answer dialog, you should write an intermediate

ction, similar to the approach shown with `customYesNoDialog()`. Your main
le calls the intermediate function, which in turn calls `customAnswerDialog()`.
[Listing 16-2](#) shows the code of a typical intermediate function.
